## VERALUBE – PW60

Veralube – PW60 is a Paraffin wax emulsion for the improvement of surface qualities of lacquers and coatings. Veralube – PW60 is a free flowing, homogenous, aqueous wax emulsion manufactured, by proper selection of emulsifier and maintaining the right combination of wax and emulsifier. The product is free from APEO and environment friendly.

### Product Specifications:

Appearance	Free Flowing milky white emulsion
Solid Contents	40%
pH 10% aq.soln.	7.0
Ionic Nature	Non-Ionic
Solubility	Dispersible in water

### Properties:

Veralube – PW60 is designed for following applications,

- ☐ Wall paints
- ☐ Wood lacquers
- ☐ Leather coatings

It increases the water resistance, smoothness of the surface, slip, scratch resistance and act as anti blocking agent.

### Processing and Dosage:

Veralube – PW60 should be directly added into the formulation after good mixing of all other ingredients. It is readily dispersible therefore 5-10 minutes stirring is sufficient. Its 3-4% dosage in reference to entire formulation gives good results.

### Handling & Storage:

Material should be stored under shade at temperature about 20-25°C. Exposure to direct sunlight is to be avoided. Containers should be properly closed to prevent surface evaporation of the material.

### Shelf Life:

Six months from date of manufacturing.
